Physical Observation Checklist for

Impact Evaluation Study on "Secondary Towns Integrated Flood Protection (Phase-2)" Project –BWDB part

1. Kushtia: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Rehabilitation of 3 Nos Groynes near Renwok, Thanapara and Manglabaria.						
Revetment Works; near Manglabaria.						
Revetment Works; near Manglabaria.						
Revetment Works; near Jugiar.						
Revetment Works; near Jugiar.						
Flood Embankment with slope Protection; near Thanapara.						
Flood Embankment with slope Protection; near Thanapara.						
Flood Embankment with slope Protection; near Kutipara.						
Flood Embankment with slope Protection; near Amlapara.						
Flood Embankment with slope Protection; near Borobazar.						
Flood Embankment with slope Protection; near Char Milipara.						
New regulators – near Thanapara, near Kutipara, near Amlapara, near Borobazar and near Milipara,						
New Regulators near Lalon Shah Mazar; Landing Ghat at Borobazar.						

2. Rajshahi: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
New Revetment; near Talaimari Shahid minar.						
New Revetment; near Talaimari minar BOP.						
New Revetment; near Kajla Graveyard and Eidghah.						
New Revetment; at Fultola and Char Kajla.						
New Revetment; near Dhorompur Mosque ghat and Zahaj ghat.						
New Revetment; near Satbaria Eidgah Ghat.						
New Revetment; from Eidghat to Gurir Char.						
New Revetment; at Khojapur Balu Ghat.						
New Revetment; at Char Shampur - Shampur Balu Ghat.						
Revetment Works; near Shampur Balu Ghat.						
Revetment Works; near Shampur WT plant.						
Revetment Works; at Shahapur Ghat.						
Revetment Works; at shahapur BOP.						
Re- sectioning of Embankment- at Berpara-Nabaganga, Bolonpur – Dargapara, Shamokhdum college-Talaimari BOP, Mizaner Moar- Shampur.						
Metalling of top of Embankment at Bolonpur-Keshobpur, Kajla and near Shampur.						
Flood Wall at Dargapara.						
Excavation of Drainage channels of Satbaria Khal (Rajshahi University Rail gate – Folierbeel – Borgachi sluice gate),						

Appendix-6: Observation Checklist

Fudkipara Khal (Darghapara sluice gate – Barnai river) and Kalpona Khal (Kalpona sluice – Nowhata sluice).						
--	--	--	--	--	--	--

3. Gaibandha: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Repair of Revetment at Paschim Kumumai						
New Revetment works at Purbo, Paschim Kumumai and chakmamrozpur						
Revetment works near Purbo Kumumai and Baguria.						
Revetment works near Chakmamrozpur, Narayanpur and Kholabari						
Revetment works near Brogayeshpur						
Revetment works near Purbo Kumumai and Dakshin Ghaghoa						
Revetment works near Dakshin Ghaghoa and Baguria Gidari						
Repair of revetment at Purbo Kumumai near Old Ghagot						
New Revetment; Pulpbondiand on Alai River and at Purbo Kumumai						
New Regulators at Narayanpur and Barapurkani						

Appendix-6: Observation Checklist

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
New Revetment; at Narayanpur and Barapurkani						
Repair of Revetment; at Narayanpur and Barapurkani						
Repair of Regulators at Narayanpur						

4. Jamalpur: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Revetment works and cross dam at Pathalia to Civil Serzen House						
Revetment works at Civil Serzen House to Fouzdari Mor						
Revetment works at Fouzdari Mor to Kali ghathe						
Revetment works at Kali ghathe to Kumar para						
Revetment works at Kumar para to Sherpur bridge						
New regulator at Bangsha Khal						
New regulator at Chalapara						

Appendix-6: Observation Checklist

New regulator at Goyabaria						
New regulator at Pathalia						
New Regulator at Dewanpara						
New Regulator at Bania bazaar						
New regulator over Goba khal						

5. Mymensingh: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Revetment works from Fulbaria road to Beltoli Mohori Bari						
Revetment works from Shomvugong bridge to Patgudam, Char Islambag						
Drainage outlets from Shomvugong bridge to Patgudam, Char Islambag						
Revetment works at Patgudam and from Char Islambag to Kalibari Gudara Ghat						
Revetment works from Kalabari Gudara Ghat to Bipin park.						
Drainage outlets from Kalabari Gudara Ghat to Bipin park.						

Appendix-6: Observation Checklist

Revetment works from Police Line to Katgola Bazar						
Drainage outlets from Police Line to Katgola Bazar						
Revetment work from Katgola Bazar to Vetanari College						
Drainage outlets from Katgola Bazar to Vetanari College						
Revetment work from Vetanari College to Khakdor Bazar						
Drainage outlets from Vetanari College to Khakdor Bazar						
Revetment works from Khakdor Bazar to BDR camp						
Drainage outlets from Khakdor Bazar to BDR camp						
Protective work, side drain at Kalibari road and from shomvuganj bridge to Bipin park						
Revetment works from BDR camp to Khakdor rail line						

6. Manikganj: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Revetment works at Baytha Ghat						
Revetment works at Boalia						
New Flood Embankment, Re-sec. of Embankment and revetment on slope of embankment from Tora bridge to Boalia.						
New Flood Embankment, Re-sec. of Embankment and revetment on slope of embankment from Boalia to Dergram Bazar.						
Flood wall from Boalia and Dergram Bazar to Jagir bridge						
Revetment works at Boro sorondi						
New regulators from Bandutia to Southa Khal regulator						
New regulators at Sonakandi regulator						
New regulators at Nalura Khal regulator						
Box / pipe sluices at Sonakandi Jamidar Bari Khal regulator						
Box / pipe sluices at Mokimpur regulator						
Box / pipe sluices at Char Matto						
Box / pipe sluices at Mohespur						
Box / pipe sluices at Dergram						
Box / pipe sluices at Dergram Bridge						

7. Munshiganj: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Flood wall with revetment near President Yasuddin Ahmed College						
New flood embankment with revetment on slope and at Hatiokkigong						
Flood wall with bank revetment at Mirersorai						
Flood wall with bank revetment at Nawagaon						
Flood wall with bank revetment at Ferry Ghat						
New regulator at Bagbari, Mirershari, Nawagaon, Hatlokkhiganj, dhalbari and Champatali						

8. Brahmanbaria: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Embankment protection New/ Rehab at Kawtali and Unchapara						
Embankment protection at Kawtali, Nayanpur, Chandankhli						

Appendix-6: Observation Checklist

New flood embankment at Simrailkandi and Kawtali at RB of Titas river and Anderson Khal						
Bank revetment work from Simrail Kandi to Townkhal						
Bank revetment work from Police Fari Khal to Moilarvita						
New regulator at Merura Sachanghat khal, Police Fari Khal, Thana HQ, Agricultural Office, Kawtali						

9. Sunamganj: Present Condition and Functional Status of Flood Protection Works

Type of works with specific location	Unit (No./km)	Present Condition	Functional Status	Repair & Maintenance needed	Work not done	Remarks
Bank Protection at Weghkali point						
Re-section and rehabilitation of Embankment and new bank at Weghkali point						
Embankment from Food Godawn to Berpara						
Revetment work at Lanchghat

6. Implementation Period	Date of Commencement	Date of Completion
Original	01-07-2004	30-06-2009
Latest Revised	01-07-2004	30-06-2013
Actual	01-07-2004	30-06-2013

07. Background of the Project:

Bangladesh has experienced rapid urbanization since independence. The urban bases have expanded rapidly from 7.6% to 25% between 1970 and 2005. The rapid pace of urbanization is going to continue in future. Rapid urbanization has created growing demand for urban infrastructure services. The development of urban infrastructure has not kept pace with rapid urbanization, causing an acute shortage causing an acute shortage in urban infrastructure and service. Drainage tends to be underdeveloped and poorly maintained. There are not adequate roads to meet growing traffic volume. Rapid urbanization is largely attributed to migration from rural areas. Such migration is propelled by rural poverty. Vulnerability to flood protection, river erosion, lack of employment and livelihood opportunities in rural areas, lure of urban areas etc. Owing to resource constraints and lacks of institutional capacity, Pourashavas/ Cities are unable to provide necessary civic facilities and services. It is imperative to scale up civic

Cwikkó -8t Terms of References (ToR)

amenities and infrastructural facilities in various categories of Pourashavas/Cities to provide secure living environment and to grow economy.

The devastating floods of 1987 and 1988 was a reminder to all concerned, including policy makers and external development partners, that the threats of severe flooding could no longer be left unattended. In July 2004, a severe flood occurred in Bangladesh causing severe flood damage in many parts of the country. In some parts of the country, flood levels were similar and even higher than those experienced in the major floods of 1988 and 1998. The towns of Jamalpur, Mymensingh, Manikganj, Munshiganj, Brahmanbaria and Sunamganj were badly affected by the major floods of 1988, 1998 and 2004 underline the importance to Bangladesh of successfully implementing STIFPP. A strong consensus was formulated quickly for an immediate action in concerted manner. A year later, the Government and the international community together formulated a comprehensive programme, called the Flood Action Plan (FAP), to develop sustained solution to the dangers of annual flooding. The FAP comprised 26 activities for physical investments, technical studies and support activities. For urban flood protection. For urban flood protection, the FAP identified Dhaka and 15 district towns (Khulna, Kurigram, Dinajpur, Panchagram, Habiganj, Moulavibazar, Rajshahi, Gaibandha, Kushtia, Mymensingh, Jamalpur, Brahmanbaria, Sunamgonj, Manikgonj and Munshigonj) to be supported by the Asian Development Bank (ADB). On its part, ADB provided two loans for urban flood protection to cover Dhaka and six of the fifteen district towns. The six towns under the Secondary Towns Integrated Flood Protection Project (Phase-1) are Khulna, Kurigram, Dinajpur, Panchagarh, Habiganj and Moulavibazar. The projects have been completed and ADB's intervention proved to be very effective, as evident during another massive flooding in 1998. Moreover, the monitoring and evaluation reports confirmed that total beneficiaries exceeded the targets set during project appraisal. The respondents in both slum and non-slum areas cited significant direct benefits from reduced flood damage, including improved hygiene and a cleaner environment and more efficient solid waste collection. Substantial indirect benefits were also reported, including better housing, higher land values, increased daily incomes and reduction in illness and medical costs. The Project also provided significant employment opportunities in construction sector for the local poor. Based on the positive feedbacks, the Government and ADB agreed to complete the flood protection facilities for the remaining nine towns that were left out from the First Phase of the Project.

The past experience demonstrated that piecemeal efforts had been generally ineffective and, in some cases, inadvertently compounded environmental health hazards. Inadequate drainage resulted in polluted waters remaining stagnant in low-lying lands (often densely populated slum areas) for long periods. Uncoordinated collection and disposal of solid waste contributed to localize flooding due to clogged drains. In this backdrop, a clear and urgent need emerged to integrate flood protection works with other infrastructure and environment improvement measures in selected high priority nine secondary towns to maximize the impact in GDP growth. Accordingly, the Secondary Towns Integrated Flood Protection (Phase-2) Project (STIFFP-2) was designed anchored in an integrated approach where flood protection was combined with drainage, sanitation, solid waste management and slum improvement in one project.

08.	Project Objectives
	<p>The project will promote economic growth and alleviate poverty in nine selected towns in Bangladesh namely, Kushtia, Rajshahi, Gaibandha , Jamalpur, Mymensingh, Manikganj, Munshiganj, Brahmanbaria and Sunamganj, Providing a flood-free and secure lining environment within the framework of integrated flood protection. The integrated approach, combining river protection works with drainage improvement and basic municipal service, is the basic requirement for the development of the urban areas in Bangladesh, which are prone to frequent river flooding, particularly in low lying area with poor drainage system. The urban sector in Bangladesh remains in a priority for the government because it presents a greater opportunity for both pro-poor economic growth as well as targeted Poverty seduction particularly at the secondary town's level.</p>
	<p>While the project benefits the entire urban community in the project towns, some components of the Project will focus on upgrading the conditions of the poorest and most needy groups in the slum areas in particular. The project will also promote active participation of women citizens in municipal management and services as both beneficiaries and agents, through urbann governance reforms and support to gender and development activities.</p>
	<p>Thus the objectives of the proposed investment of the project can be conveniently summarized in two parts as follows:</p> <p>(a) Broad Objectives: To alleviate poverty and provide a flood –free and secured living environment in the nine selected towns.</p> <p>(b) Development Objectives: To implement the Projects of the selected nine secondary towns comprising the following components:</p> <ul style="list-style-type: none">• Component A-Flood Protection Works• Component B-Urban Drainage System Improvement• Component C Urban Environmental Improvement• Component D –Capacity Building & Implementation Assistance
	<p>Bangladesh Water Development Board (BWDB) will execute fully the Component A: Flood protection works, and be involved in part of Component B: Drainage System Improvement outside the Pour shave and part of Component D, detail design of the various investment components through Management, Design & Supervision (MDS) Consultants.</p> <p>LGED through the City Corporation/ Pourashavas will execute Component C fully and Part of Component B and part of Component D. This Component of works mainly include initiatives and works for improvement of drainage and environmental facilities under rehabilitation and cleaning of internal drains, new construction and remodeling drains, culverts, bridges to minimize internal complementary sanitation, solid waste management and slum improvement. After implementation of the project, the residents of the towns under this project will enjoy enhanced quality of life with flood –free and better environmental facilities and be able to participate in the long term and stable development activities.</p>

09.	Objectives of the current Assignment:
a.	To review the target and actual progress of items of work implemented under the project and provide reasons for any deviation.
b.	To observe and comment on the present functional status of major items of work in the areas to be selected for survey.
c.	To examine whether the procurement process (Invitation of tender, evaluation of tender, approval procedures, contract awards etc) of the packages (goods, works and services) under this project was done following existing procurement rules.
d.	To apply SWOT analysis by considering project documents and present situation of the project areas.
e.	To assess the flood protection works, urban drainage system and urban environmental improvement activities.
f.	To assess the poverty reduction, rehabilitation, construction and remodeling drains, and culverts.
g.	To assess the extent of participation of local communities in planning, implementation, maintenance and management of the infrastructures.
h.	To recommend measures/lessons for more effective and sustainable management of project activities and replication of best practices in future projects.

10.	Responsibilities of the Consultant Firm:
a.	Consulting firm will cover 100% of the districts under the project for this evaluation.
b.	Consulting firm will address all the stated objectives of current assignment.
c.	Consulting firm will conduct interview with beneficiaries.
d.	Consulting firm will conduct in-depth discussions and consultative meetings with PD, field officials.
e.	Consulting firm will also conduct FGD meetings with community leaders, local elite, teachers, students and concerned stakeholders of Pourashavas/city corporation etc
f.	Consulting firm will conduct Case Study, if needed.
g.	Arrange a local level workshop in any of the project areas to hold discussion with stakeholders and beneficiaries during data collection.
h.	Prepare evaluation report based on the collected from the project areas and get approval from the authority concerned.
i.	Arrange a national level workshop for dissemination of the study findings and finalize the report incorporating workshop inputs.
j.	Printed fifty (50) copies (40 copies will be written in Bangla and 10 copies will be written in English) of the final report will be submitted to the Director General, Evaluation Sector, IMED. Printing cost will be borne by the firm.
k.	The duration of the assignment will be 4(Four) months from the signing of the contract.
l.	All reports must be written in using “Unicode Based Font”
m.	Any other related works assigned by the approval authority.

Cwílikó -8t Terms of References (ToR)

11. Professionals required for the evaluation works:

No.	Type of professionals	Educational qualification	Experience required
1.	Team Leader Evaluation specialist	At least B.Sc in Civil Engineering /Water Resource Engineering. Ph. D degree in relevant field will be given preference.	At least 7 years experience in conducting relevant/related studies. Experience as team leader for impact evaluation and procurement related works will be given preference.
2.	Water Resource Engineer/ Hydrologist	At least B.Sc. degree in Water Resource Engineering.	At least 5 years experience in conducting research or work experience in water resource management and hydrology.
3.	Environmental Specialist	At least Masters' degree in Environmental Science	At least 5 years experience in conducting environmental researches and data management activities related to impact evaluation.
4.	Socio-economic Specialist	At least Masters' degree in Economics /Social Sciences	At least 5 years experience in conducting socio-economic researches/ impact evaluation on programmes and data management activities related to impact evaluation.

12. Methodology:

Since the purposes of this assignment are to assess the implementation status of major components the project and its impact on the concern stakeholders. It is expected that an appropriate evaluation design should be used which will cover the some relevant changes occurred due to intervention of major components of the project. The methodology should be a sound one mentioning target population to be interviewed with both type and size. It is also necessary mentioning precision level and level of significance used for determining the sample size. Sampling technique used for data collection should also be mentioned in the methodology section. List of indicators in conformity with this evaluation should be determined and reported in the inception report.

13.	List of Reports, Schedule of deliveries, and Period of Performance:
a.	<p>Following are the primary identified outputs, which could be redesigned and extended in consultation with the procuring entity on the basis of the needs of evaluation achieve its overall objectives.</p> <ul style="list-style-type: none"> i. Inception Report ii. Draft Report iii. Draft Final Report For Workshop iv. Final Report
b.	<p>Inception report including study design and data collection instruments (DCIs) should be submitted within Fifteen (15) days after signing of contract agreement for approval. The report will be written in Bangla language. The report will include the work plan along with detailed task, specific manpower allocation and details of surveys and data collection needed, actions to be taken and progress on these activities.</p>
c.	<p>The consultant will prepare the draft study design and questionnaires of study and obtain approval of the Technical and Steering committee before collection of data from the field level (required number of relevant documents including set of questionnaire will have to be provided for each meeting).</p>
d.	<p>Draft report should be prepared and placed to the technical and steering committee for approval.</p>
e.	<p>Before submission of the final report, a national level workshop/seminar will be organized to disseminate the study findings. For this seminar 50 (Fifty) copies of draft report should be submitted for distribution among the participants of the seminar. Output of the Workshop/Seminar would be incorporated in the final report. Workshop cost will be borne by the consulting firm and should be reported in financial proposal.</p>
f.	<p>Printed fifty (50) copies of the final report (40 Copies in Bangla and 10 copies in English) will be submitted to the Director General, Evaluation Sector, IMED and the printing cost will be borne by the Consultant, and should be reported in financial proposal.</p>

14.	Data, Personnel, Facilities and local services to be provided by the client:
	Only project related following documents will be provided by the client, if available;
a.	<p>Project document (DPP).</p>
b.	<p>Project Completion Report.</p>
c.	<p>IMED Completion Report, etc.</p>
